EOSC : European Open Science Cloud

Qu'est-ce que l'EOSC ?

- ***Web of FAIR* research data and services***

- Accès pour tous les chercheurs européens aux données scientifiques, e-infrastructures et services

- Relier les données / services / infrastructures existants

- Pensez à l'EOSC comme une **interface**

- *Free at point of use*

- L'EOSC va répondre à vos **besoins** de services et données ouvertes, équitables et partagées.

"The EOSC is fully aligned with the French strategies on digital transition and on Open Science. EOSC is part of our Open Science strategy, the French National Plan for Open Science, as expressed in 2018 and 2021, which explicitly encourages the structuration of the French research landscape along with the EOSC. We also underline the importance of the EOSC infrastructure to support Open Science in the context of our national strategy on data, algorithms and source codes. Open Science needs services and infrastructures it can be build upon, it needs skills and knowledge to facilitate the whole research data lifecycle, it needs capacity to host services and data."
Cyril Moulin, Adjoint à la Directrice Générale de la Recherche et de l'Innovation au MESR

"The open calls under this activity should respect the conditions laid out in Section B of the General Annexes, including transparency, equal treatment, conflict of interest and confidentiality.
Research infrastructures which are beneficiaries/affiliated entities of the consortium awarded may exceptionally also be recipients of financial support to third parties.
Proposals must explain how they will ensure that such beneficiaries/affiliated entities are not involved in the selection procedure of the calls, in order to avoid conflicts of interest and maintain confidentiality."

Topic HORIZON-INFRA-2023-…	Description non exhaustive
EOSC-01-02 RIA 8 M€ 1 projet prévu	Development of community-based approaches for ensuring and improving the quality of scientific software and code Outcomes: • A framework of community curation is established and promoted that ensures quality of software and code across the different disciplines. • Infrastructure, tools and services are deployed that allow researchers to properly develop, describe with proper metadata, version, archive, share and reuse research software. • The notion of software quality is defined in the context of EOSC and builds upon established practices by the FAIR and other communities. • Baseline quality indicators along the notion of "minimum quality" are defined for the different types of digital objects targeted (software, code, etc), taking into account the concept of "fit for purpose". • The quality of research software, both from the technical and organizational point of view for research software is improved, both in general (e.g. software for data analysis) and in particular for software used in the services offered through EOSC. • Software is developed in a sustainable way and its reuse is maximised
