 Request meeting

Company

Transkinect Private limited

"Power Potentials is a new idea factory from Transkinect Pte Ltd Singapore. Founded in 2014 by Ihab Seidy with two local Singaporeans.

Mr. Seidy had spent eight-years in the Arab Gulf region during the booming construction years, but then decided to continue to pursue his lifelong vision of power innovation to the world.

A move to Singapore rekindled Ihab's desire to explore the frontiers of more efficient, sustainable power. He saw the overwhelming power injustices of service and cost around the world and wondered how technology could make greener power more affordable to everyone.

So four years of experimentation, research and study produced a "smart hump" product that used the kinetic energy of passing vehicles on roads to generate clean power that could be utilized in many applications along any city streets or highways."

4. Choose a suitable date and timeslot and launch your meeting request!

PROJECT COOPERATION

EU consortium on pandemic early detection

An early warning system for pandemics is lacking in the EU. That is why we have co-founded a consortium dedicated to this.

What we do:

Researchers develop biomarkers as laboratory tests for early detection, Data Scientists find relevant data from pre-hospital and hospital settings to identify prognosis and early warning factors with A.I./AI.

What we can do:

Biomarkers: identification/development and analysis

Regulation (MDR, MPDG)

AI: see www.AI4SMB.de, also in healthcare

eHealth: telemedicine, DIGAs, CIM & CISystems

eLearning: content, blended courses, esp. for clinicians

See more this EU-wide project https://health.ec.europa.eu/latest-updates/first-meeting-hera-civil-society-forum-2022-06-29_en und <https://ec.europa.eu/info/funding-tenders/opportunities/portal/screen/opportunities/topic-details/horizon-hlth-2022-disease-07-02> and via www.AI4SMB.de.

Our consortium includes partners from clinics to research from Belgium, Germany, Greece, Ireland, Italy, Portugal, Spain.
