Journée d'information

Mission Cancer: session webinaire 12 AVR 2024, 14:30 – 15:30

Horizon Europe en bref

9^e PCRI: 2021-2027

« Le programme de financement de la R&I le plus ambitieux jamais entrepris »

- Budget : 95,5 Md€
- Continuité avec Horizon 2020 : « **une évolution, pas une révolution** »
- Politique de Science ouverte
- Une plus grande ouverture sur l'international

- **NOUVEAUTÉS**
 - Conseil Européen de l'Innovation
 - **Missions**
 - Partenariats

La santé dans Horizon Europe

13,6 Md€

Pilier 1
Science d'excellence

Conseil européen de la recherche

Actions Marie Skłodowska-Curie

Infrastructures de recherche

53,5 Md €

Problématiques mondiales et compétitivité industrielle et européenne

Santé

8,24Md€

Culture, créativité et société inclusive

Sécurité civile pour la société

Numérique, industrie et espace

Climat, énergie et mobilité

Alimentation, bioéconomie, ressources naturelles, agriculture et environnement

Centre commun de recherche

25 Md €

Pilier 3
Europe plus innovante

Conseil européen de l'innovation

Écosystèmes européens d'innovation

Institut européen d'innovation et de technologie

Élargir la participation et renforcer l'espace européen de la recherche

3,4 Md €

Élargir la participation et développer l'excellence

Réformer et consolider le système européen de R&I

6 domaines d'intervention

Planification stratégique
• 2021-2024
• 2025-2027

Priorités politiques de l'UE (Transition verte et numérique)
Orientations Stratégiques pour la R&I
“Expected impacts” – Destinations (Santé)

Partenariats en santé

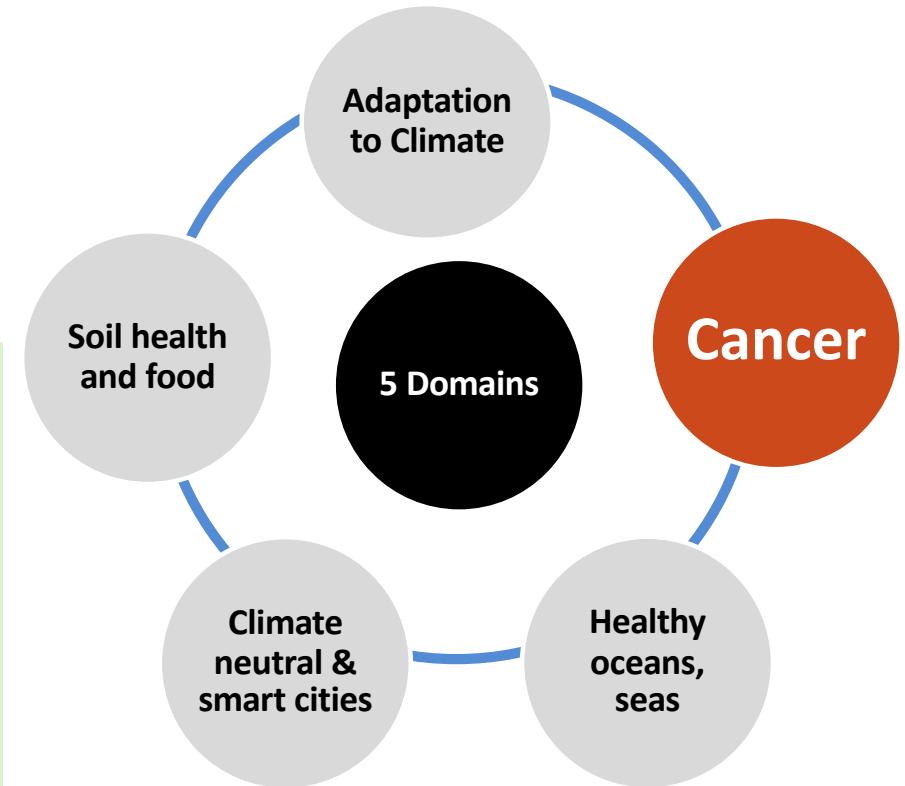

Mission Cancer

La Mission Cancer dans Horizon Europe

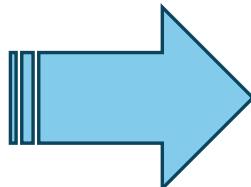

Five main **operational goals** = Five missions

- Combination of **research** projects, **policy** measures or even legislative initiatives to achieve a common goal that could not be achieved through individual actions.
- **Transversality** (between disciplines / different sectors)
- **Co-design** (with citizens, local stakeholders..)

La Mission Cancer dans Horizon Europe

2018

DG RTD
09/2020

DG Santé
02/2021

DG RTD
09/2021

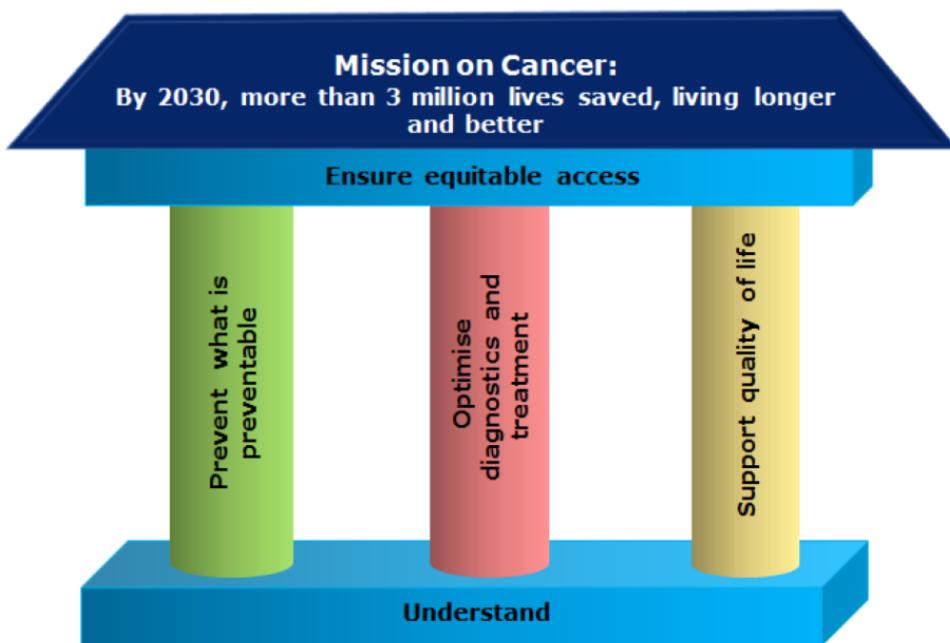

“Missions’ goal is to involve citizens and stakeholders more closely in setting research priorities, but not only, which will lead to equal access for everyone in Europe to the best of European innovation & research resources, and global know-how”

Cancer Mission Actions

- ✓ Innovation
- ✓ Risk taking
- ✓ Citizen Engagement
- ✓ Commitment at National level
- ✓ Commitment of all
- ✓ Equitable Access

Objectif : « D'ici 2030, plus de 3 millions de vies sauvées, vivre mieux et plus longtemps »

La mission cible l'**ensemble du continuum du contrôle du cancer**, de la prévention des facteurs de risques, l'amélioration des diagnostics et des traitements des patients, au soutien des survivants dans leur qualité de vie

→ Programme de travail dédié

Cancer Mission - WP2021-2022-2023

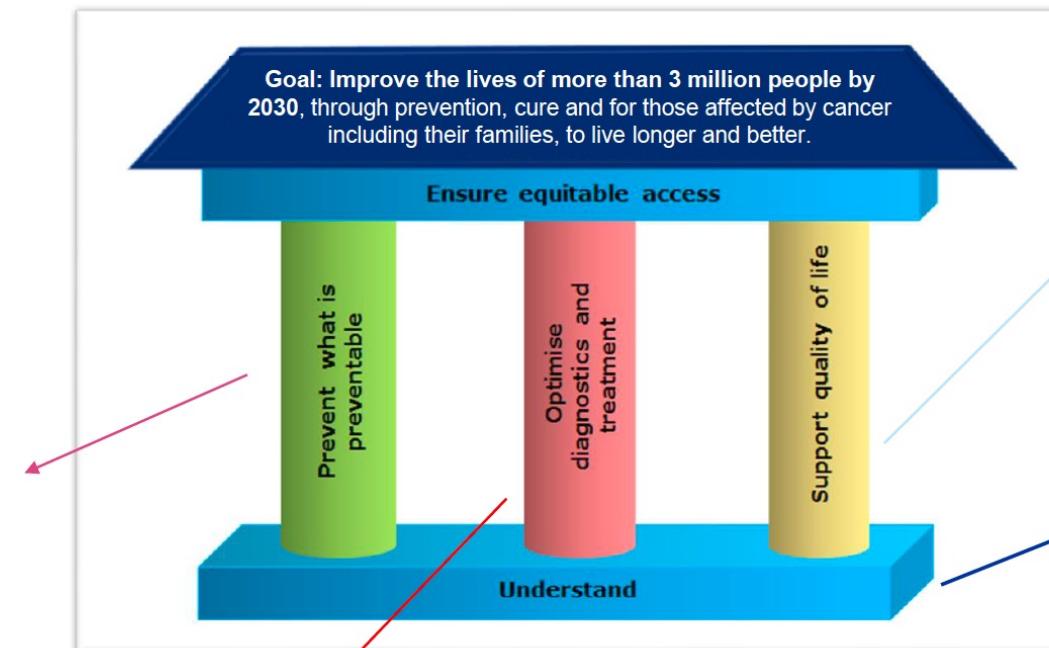

Overall approach

- Apply mission-guiding principles
- Develop mission projects clusters
- Synergies with Europe's Beating Cancer Plan
- Total budget 2021-2023: € 365 M*

Develop new methods and technologies for screening and early detection
HORIZON-MISS-2021-CANCER-02-01

Improving and upscaling primary prevention of cancer through implementation research
HORIZON-MISS-2022-CANCER-01-01

Enhance cancer prevention through behaviour change
HORIZON-MISS-2023-CANCER-01-02

Pragmatic clinical trials to optimise treatment for cancer patients
HORIZON-MISS-2022-CANCER-01-03

Strengthen research capacities of comprehensive cancer infrastructures
HORIZON-MISS-2022-CANCER-01-02

Pragmatic clinical trials minimally invasive diagnostics
HORIZON-MISS-2023-CANCER-01-03

Develop and validate a set of quality of life measures for cancer patients and survivors
HORIZON-MISS-2021-CANCER-02-02

Towards the creation of a European Cancer Patient Digital Centre
HORIZON-MISS-2022-CANCER-01-04

Improve quality of life for survivors of childhood cancer (Best practices and tools)
HORIZON-MISS-2023-CANCER-01-04

Preparing UNCAN.eu, a European initiative to understand cancer
HORIZON-MISS-2021-UNCAN-01-01

Better understand healthy versus cancer cells at individual and population level
HORIZON-MISS-2021-CANCER-02-03

Better understand tumour-host interactions in cancer patients
HORIZON-MISS-2023-CANCER-01-01

Creation of national cancer mission hubs to support the implementation of the Mission on Cancer - HORIZON-MISS-2022-CANCER-01-05

Les objectifs pour 2024

Draft WP 2023-2025

Obj. Understanding: implementation of a broad portfolio of **cancer use cases**, preparing the operationalisation of the **UNCAN.eu research data platform**.

Obj. Prevention: support the development of tests for **early detection of heritable cancers**.

Obj. Diagnosis and treatment: action to facilitate coordination among charities and other relevant stakeholders for the establishment and implementation of a **funding programme for pragmatic clinical trials**.

Obj. Quality of life: enhance the **quality of life for survivors of adolescent and young adult (AYA) cancer** by improving the understanding and management of late effects of treatments. In addition, under the same objective, the development of a **pilot information portal for cancer patients**, survivors and caregivers, which will form the basis of the future European Cancer Patients Digital Centre.

>>> + **Dialogue:** to foster the **dialogue at national level between relevant actors and stakeholders**, for example to further support the establishment and implementation of both the **UNCAN.eu and ECPDC digital platforms**.

6 thématiques ; 119 M€ - Deadline 18 SEP 2024

Draft WP 2023-2025
Publications 17 avril 2024

| Table 1/2 | HORIZON-MISS-2024-CANCER-01-01: Use cases for the UNCAN.eu research data platform | HORIZON-MISS-2024-CANCER-01-02: Support dialogue towards the development of national cancer data nodes | HORIZON-MISS-2024-CANCER-01-03: Accessible and affordable tests to advance early detection of heritable cancers in European regions |
|---------------------------------------|--|---|--|
| Expected EU contribution per project | 30,00 M€ | 3,00 M€ | 10,00 à 12,00 M€ |
| Total Indicative budget for the topic | 30,00 M€ | 3,00 M€ | 35,00 M€ |
| Type of Action | RIA | CSA | IA |
| Expected outcome | <ul style="list-style-type: none"> - operationalise the UNCAN.eu research data platform through a series of use-cases. ⇒ develop tools supporting researchers to access, manage and analyse cancer digital data... | <ul style="list-style-type: none"> - Data resource to improve our understanding of cancer, advance prevention and early detection strategies, facilitate the delivery of personalised care, and better address the quality of life of cancer patients and survivors ⇒ Cancer data nodes | <ul style="list-style-type: none"> - Decisive action on early detection using easy-to-use, specific and sensitive, affordable and accessible genetic multi-omics or other biomarker-based tests to diagnosing and treating cancer with an underlying heritable genetic risk at an earlier, potentially curable stage, and with fewer side-effects |

Draft WP 2023-2025

| Table 2/2 | HORIZON-MISS-2024-CANCER-01-04: Support a pragmatic clinical trial programme by cancer charities | HORIZON-MISS-2024-CANCER-01-05: Improving the understanding and management of late-effects in adolescents and young adults (AYA) with cancer | HORIZON-MISS-2024-CANCER-01-06: An information portal for the European Cancer Patient Digital Centre |
|---------------------------------------|---|--|--|
| Expected EU contribution per project | 3,00 M€ | 4,00 à 6,00 M€ | 12,00 M€ |
| Total Indicative budget for the topic | 3,00 M€ | 36,00 M€ | 12,00 M€ |
| Type of Action | CSA | RIA | IA |
| Expected outcome | <ul style="list-style-type: none"> - Pragmatic clinical trials focus on choosing between care options. Pragmatic trials evaluate effectiveness, the effect of treatment in routine (real-world) clinical practice. ↳ examples: treatment versus active surveillance in patient management, ↳ a combination of treatment interventions, ↳ determination of optimal dose and dose schedules, ↳ comparative effectiveness of different treatment interventions. | <ul style="list-style-type: none"> - Increased awareness and understanding in AYA cancer survivors - Ensure accessibility and re-usability of data - Identification of effective interventions and best practices to support AYA patients and survivors in preventing, reducing, managing late-effects, promoting optimal health outcomes and overcoming disparities between regions; - Improved quality of life and long-term outcomes for AYA cancer survivors, including improved physical, emotional, and social well-being. | <ul style="list-style-type: none"> - Improving the quality of life of cancer patients, survivors and their families through the future European Cancer Patient Digital Centre (ECPDC) to facilitate their access to quality information and data sharing. => to design, develop, deploy and operate a pilot information portal of the ECPDC covering all the spectrum of the cancer patient journey. => Specific AI tools to timely update the information provided and facilitate the user experience. |

Actions complémentaires non soumises à appels à projets

Synergies with other missions, exemples:

- healthier living environment and more active lifestyles;
- pollution in the ocean and waters;
- better water and air quality, reduce food contamination ...
- 0,5 M€ onto 2024 clusters budget
- Indicative timetable: 3rd Quarter 2024 - 1st Quarter 2025 ; request during the GA preparation

Missions working together

Important synergies link the objectives of the EU Mission on Cancer to the other EU Missions. They enable the different Missions to mutually reinforce one another and improve outcomes. This is especially true when it comes to prevention and improving quality of life:

1 Limiting the use of cars in urban areas, digitalising transport operations or developing public transport, and developing better walking and cycling conditions will promote a healthier living environment and more active lifestyles through the Climate Neutral and Smart Cities Mission.

2 By preventing, minimising, remediating and monitoring pollution in the ocean and waters, the Oceans Mission will support the prevention of cancer;

3 By promoting a pollution-free environment, organic farming, safe non-polluted food and healthier diets, the Soil Health and Food Mission will ensure better water and air quality, and reduce food contamination with chemicals, which is key to reducing cancer;

4 Increasing air quality, combating air pollution, improving the quality of life and protecting vulnerable people, including those at higher risk of cancer are key objectives of the Adaptation to Climate Change Mission.

In turn, the Mission on Cancer, through actions on sustainable procurement (e.g. to increase energy efficiency of healthcare services and buildings) and prevention of contamination of food and water with pharmaceuticals/chemicals, will contribute to the other Missions achieving their goals.

Policy dialogues on international collaborations:

- Enhance cooperation with 3rd countries including research, policy makers and stakeholders;
- ⇄ 0,5 M€ onto 2024 clusters budget
- Indicative timetable: 3rd Quarter 2024 - 1st Quarter 2025

Communication, citizen engagement and stakeholder consultation:

- dissemination to inform citizens and stakeholders on Mission activities;
- events to engage citizens, patients and caregivers;
- experts group meetings...
- 3,47 M€ onto 2024 clusters budget
- Indicative timetable: 1st Quarter 2024 - 4th Quarter 2025

Engaging citizens

To take account of citizens' views and needs, the Mission involves them in the design, implementation and review of mission actions to ensure they are listened to, represented and engaged with throughout.

Different activities such as workshops, focus groups and surveys will target citizens of different walks of life, including young people, patients and their families and caregivers, and the elderly. To foster participation, each activity will be adapted to its specific audience and national language.

Monitoring

- A study to further develop a framework for the monitoring of the implementation of the Mission on Cancer, in synergy with the monitoring framework of the Europe's Beating Cancer Plan.
- 0,5 M€ onto 2024 clusters budget
- Indicative timetable: Q1 2024

Types d'action

RIA - Research and Innovation Actions

- recherche fondamentale et appliquée, développement et l'intégration de technologie, essais et validation d'un prototype à petite échelle dans un laboratoire ou un environnement simulé

Taux de financement européen 100%

IA - Innovation Actions

- prototypage, essais, démonstration ou pilotes, validation du produit à grande échelle, première commercialisation. Les projets peuvent inclure des activités limitées de recherche et de développement

Taux de financement européen
100% pour les entités publiques - 70% pour les entités privées

CSA - Coordination and Support Actions

- études de design pour de nouvelles infrastructures, activités complémentaires de planning stratégique, mise en réseau et la coordination entre programmes dans différents pays

13

Taux de financement européen 100%

Règles de participation

Idem Horizon Europe

✓ Conditions d'éligibilité d'un consortium

Minimum 3 entités légales indépendantes et établies dans un Etat Membre ou Etat Associé différent, dont au moins une établie dans un Etat Membre

✓ Condition de participation

Toute entité légale de tout pays peut participer (organisme de recherche, université, PME, associations, villes....)

✓ Pays éligibles au financement

- Etats-Membres
- Etats-Associés :

• Albanie, Arménie, Bosnie-Herzegovine, Iles Féroé, Géorgie, Islande, Israël, Kosovo, Moldavie, Monténégro, Macédoine du Nord, Norvège, Nouvelle Zelande, Serbie, Tunisie, Turquie, Ukraine, **UK depuis 1^{er} janvier 2024**

Pays-Tiers : certains pays à faibles et moyens revenus sont automatiquement éligibles au financement (Programme Guide Horizon Europe)

✓ CAS PARTICULIER

Association proche: **Corée du Sud validée**, Canada et Maroc en cours de négociation

USA n'est pas éligible au financement dans la mission Cancer

Suisse: pas d'accord d'association encore. Les institutions Suisses sont financées directement par leur agence nationale.

Le diagnostic Partenariat pour les projets collaboratifs des entreprises

Le Diagnostic Partenariat Technologique International (Diag PTI) de Bpifrance vise à faciliter l'accès des entreprises françaises aux appels à projets collaboratifs de recherche, développement et innovation, au premier rang desquels Horizon Europe.

En pratique, le Diag PTI comprend

- une multitude de possibilités d'accompagnement sur toute la partie de montage du projet collaboratif : *recherche de partenaires, négociation de l'accord de consortium, écriture de dossier, ... etc.*
- une subvention qui couvre 50 % du montant TTC de la prestation d'un Expert Conseil
- une prestation adaptée aux besoins de l'entreprise : *jusqu'à 25k€ HT si l'entreprise est cheffe de file, jusqu'à 5k€ HT si l'entreprise fait partie d'un consortium sans en être à la tête*
- un dépôt *au fil de l'eau*, qui s'adapte à la timeline de l'entreprise
- une demande facilitée en ligne, sur le site de Bpifrance
- une *réponse rapide* sous 2 semaines

Quelques sources d'information sur la Mission Cancer

Publication des appels prévue le 17 avril 2024 !
